Hello Mike,

As promised, Facility drawings in pdf, kmzs and shapes are attached.

Best

Joe

Joe,

I'll start digesting this info as soon as possible so we can get the bond adjusted. Once I have it figured out, I'll let you know so we can get together to come to a consensus on it.

Meanwhile with regard to the PDFs, in case you haven't already, please send hard copy originals in the mail so we can date-stamp them and add them to the file folder.

Thanks very much for putting this together,

Hi Joe,

So far the numbers you provided look right on the money. There are a number of things currently going on with this permit that I'm proposing be consolidated into one approval action that will happen after we review the NOI amendment mentioned below. To sum it up:

- 1) GSLM is still under tentative approval for the dike reclamation plan, pending increasing the bond by the \$1.5M+ estimated for the plan implementation;
- 2) The overall surety for the facility is due for periodic escalation;
- 3) You stated in our last phone conversation that GSLM is changing it's name and will be submitting an amendment to the NOI for that purpose.
- 4) Changing the company ("Operator") name will require a new Reclamation Contract AND replacement surety instrument(s) reflecting that name change;
- 5) This provides an opportunity to consolidate the multiple sureties into one surety instrument.

The one approval action would be an approval letter that grants final approval for the dike reclamation plan, approves the additional surety as adequate for both the dike reclamation and the periodic escalation, accepts the re-signed Reclamation Contract, and approves the amendment to change the operator name.

On a side note, the borrow pit disturbed acreage summary you provided accounted for the Pokes Point and Borrows 2 & 3 in the acreage totals, but there is no GIS/Google Earth outline of them included. A site map we

received in January of 2013 (but dated 2009) shows Gravel Borrows #1 thru 4, but no Pokes Point. Could you enlighten me on what the status is of these 4 gravel borrow areas, and Pokes Point? It may be somewhere in the plan, but I haven't found it yet...I'm hoping you can tell me the status.

Thanks again for the bond calcs. And the KMZ and shape files - I'm really impressed with the accuracy and quality of them.
